

SPRAYSPHERES[®] - SC

INGREDIENTS: Lactose, Microcrystalline Cellulose, HPMC, Color (1-3%)

Brief Description and Main Properties

Spray Spheres are used as macroscopic carrier beads for cosmetic care products with a visualization effect. When rubbed onto skin, hair or on teeth during brushing, they break easily, releasing the active contents. This product is part of the standard lactose-based series. Can be used in water-based personal care formulation to provide visual effects, and delivery cosmetic actives for example: vitamin, marine, plant extract, fragrance, flavors etc.

Features

- Only approved synthetic & natural colors used.
- Encapsulation 0-50% depending on actives.
- Easily applied into formulation.
- Both hydrophobic and hydrophilic cosmetic actives can be incorporated.
- Hard and solid in bulk (easy to process and delivery).

Advantage

- Inclusion of actives & extract with enhancement visual benefits.
- Nourishes skin & hair.
- Disappears on gentle rubbing without leaving any residue on skin & hair upon application.
- It can be utilized as delivery system for encapsulation incompatible actives into same formulation.

Benefits

- Available in various colors.
- Customizable as per Pantone shade card minimum(30kg).
- Customized options for encapsulation.
- Very less usage level up to - 2% depending on particle size.
- 3-8pH stable except blue color(5-7pH).
- Composition has GRAs status.
- Biodegradable dry spherical beads.
- Beads are hard when dry but soften in contact with at least 20% of water.
- Flexible pack size & packaging available.
